

# NEW DISCOVERY!

## “HIGH SOLUBILITY WATER™”!

Invented by Engineer John Ellis, High Solubility Water™ produces GREAT blood flow and HIGH BLOOD OXYGEN THAT “CURES ANYTHING” (WASHINGTON POST as far back as 1/27/92)! As a result, it is now available in cosmetics and bottled water, while the savings in laundry detergents (which are destroying our water supplies) pays for the machine!! Customers have told us for years that because of the ability to remove contaminants, they were using a cup of high solubility tap water instead of detergents in their laundry! One man couldn't remove an oil stain from his shirt...our water removed it! NEVER drink ordinary distilled water with lower solubility than tap water. (John Ellis has an Engineering Degree that includes Steam Plant Design)

*Background: The 80 year old inventor, a Choate School and Lafayette College Engineering graduate, invented a scientific measuring device as a 17 year old (still used worldwide). An Oil Well Engineer, Design Engineer at Douglas Aerospace and Honeywell Engineer, at age 30 he started his own business and invented a switch that operates (on-off) within .0001 of an inch. Honeywell and Military/Industrial users: “He’s the only person that knows how to produce it!” In similar fashion, textbook science said “You can’t change water properties”...he HAS for the benefit of mankind!*

WHY DO PEOPLE PURPOSELY COURT DISASTER AND DRINK WATER THAT PRODUCES POOR BLOOD FLOW AFTER UCLA MEDICAL CENTER TESTED EVERY TYPE OF WATER FOR BLOOD FLOW TO THE EXTREMITIES (your blood is 94% water)?? Proving once and for all the massive health fraud perpetrated by the water industry!! Incredibly, this includes a “Which Water Should You Drink Report” ...linked to products that cause Heart Disease (Sci News 2/13/10)! How many Diabetics have lost their legs because of poor Blood Flow? **UCLA Medical Center: “Nobody can argue with something you can measure! We can measure the ability of blood to go through a membrane to the extremities. NOTHING IS EVEN CLOSE TO YOUR WATER!”** Regulators allowed products like “Put It Where It Hurts” because the results using our water can be measured non-invasively on your SKIN (Doppler Ultrasound)! Our home machines recycle water 100's of times/gallon (not ONCE) increasing the LOW “Solubility-Energy Ratio” of ordinary water (a child can measure Solubility)! A Chart shows how Solubility increases with the Hydrogen Bond Angle. Also, they don't mention that **the purest bottled, distilled, ozonated and ph ionized water all spread a HOST of disease markers from former users that are flushed into our water supplies and express themselves in a blood test** (AP 3/10/08: “57 drugs found in municipal drinking water!”) Where do users think diseases come from? Standard Water Tests don't reveal this contamination... IT'S EASY TO PROVE!! IF IT ISN'T CONTAMINATED, why do we have the only water machine in the world that can treat VAST QUANTITIES of ordinary water using ONLY small amounts of our water? Thousands of wells have been treated using ONLY 10 gallons of water on each well and it can last for years! DOLE FOODS did 9 months of testing before sending us a 7-page contract. Municipalities saved millions because they didn't have to build a waste treatment plant! I was a Well Logging Engineer when I was 25 and with greater SOLUBILITY, they also use our water in products that handle oil refinery spills with a solubility that can be increased and used to break down the oil in the Gulf without chemicals that harm the environment, wildlife and destroy human health!!

I understand the information you are providing is for educational purposes only. As stated above, this information is not intended to diagnose, treat, cure or prevent disease. In all health-related situations, qualified healthcare professionals should always be consulted.

**This beats ANY weight loss program because of the high Solubility-Energy Ratio of our water without food craving!** Food, of course, provides energy. However, I am 6' 7” and I maintain my strength on one-half as much food! My son is 6' 11” and super strong because of this water! At first, you lose excess water weight. With increased solubility, farmers produce more crops and livestock grow faster at lower cost! Farmers keep fulvic acid in suspension so they can spray it because of greater solubility! HOW IT WORKS: Years ago John Crane sent me the files of Royal Rife M.D. He discovered that you can kill viruses and bacteria with resonant frequencies. However, you also have to increase the SOLUBILITY to get blood to the extremities and we froth viruses, bacteria, small molecule drugs and disease markers of former users so we can hit them with high intensity ultraviolet modular frequency and heat 100's of times/gallon to get them all! Look at our website and read the comments of the Ad Manager of the Washington Times for 15 years with his own great success story and a contact number. Also, an article in The Washington Post as far back as 1/27/92: “This Water Cures Anything! 10,000 people/day etc.” Read an article by Investigative Reporter Pat Shannon describing why this water produces such phenomenal results and contact him at The American Free Press!
